# 1. Einführung

Die aktuellen Erfahrungen bei der Meldung von Endoprothesen zeigen, dass im Rahmen der Meldung die Unterscheidung zwischen Artikel und Zubehör in den Gesundheitseinrichtungen zu größeren Problemen führt. Um hier Abhilfe zu schaffen soll das Meldeverfahren verschlankt werden.

Die Meldung von Brustimplantaten und Aortenklappenprothesen ist hiervon nicht betroffen.

## 2. Änderungen im Vorgehen

Anhand von EMDN-Kodes werden so genannte „Leitprodukte“ definiert (Quelle der EMDN-Kodes: <https://webgate.ec.europa.eu/dyna2/emdn/Z1206>)

- „Leitprodukte“ bei Hüftprothesen (P0908) sind alle Produkte mit folgenden „Wurzel-EMDN-Kodes“ (weitere Details siehe Anlage 1):
  - P090803: HIP PROSTHESES ACETABULAR COMPONENTS
  - P090804: HIP PROSTHESES FEMORAL COMPONENTS
- „Leitprodukte“ bei Knieprothesen (P0909) sind alle Produkte mit folgenden „Wurzel-EMDN-Kodes“ (weitere Details siehe Anlage 2):
  - P090903: BICOMPARTMENTAL PRIMARY IMPLANT KNEE PROSTHESES
  - P090904: UNICOMPARTMENTAL KNEE PROSTHESES (UNICONDYLAR)
  - P090905: REVISION KNEE PROSTHESES
  - P090906: KNEE PROSTHESES FOR LARGE RESECTIONS
  - P090907: PATELLO-FEMORAL KNEE PROSTHESES

### Festlegung für „Leitprodukte“

- Nur Leitprodukte sind relevant für die Ausstellung einer Meldebestätigung.
- Nur diese sind in der Produktdatenbank registrierungspflichtig.
- Die Unterscheidung wird im Melde-Datensatz und im Artikelsystem durch zusätzliche Informationen für Hüft- und Kniekomponenten abgebildet.

### Umgang mit „Nicht- Leitprodukten“ bei Endoprothesen

- Produkte, die gemäß obenstehender Definition nicht zu den Leitprodukten Endoprothesen zählen, aber in diesem Zusammenhang implantiert werden (z. B. Schrauben, Muttern, Knochenzement, Cerclage-Material), können (weiterhin) freiwillig von den Produktherstellern in der Produktdatenbank des IRD registriert werden.
- Die verantwortlichen Gesundheitseinrichtungen übermitteln bei ihrer Meldung an die Registerstelle die Daten gem. Anlage 2 IRegBV aller implantierten Medizinprodukte. Für die Gesundheitseinrichtungen entfällt die Unterscheidung zwischen Artikel und Zubehör; es werden alle implantierten Produkte gescannt.
- Damit können sowohl in Bezug auf Kombinationen von Leitprodukten mit anderen implantierten Produkten als auch für die anderen Produkte selbst bei ihrer Verwendung bei implantatbezogenen Maßnahmen aussagekräftige statistische Auswertungen durchgeführt werden.

## Anlage 1: Liste aller EMDN-Kodes unterhalb des Levels 3 P0908 HIP PROSTHESES

Grün markiert: EMDN-Kodes von Leitprodukten Endoprothesen

Orange markiert: EMDN-Kodes von Nicht-Leitprodukten Endoprothesen
